

Proposal of 'New Suunto 9 Watch faces and other useful Features'

1. **New and current customizable Watch faces designs.** From official Suunto smartphone app only with functions of install/uninstall on watch.

- **More than one display** at a time with info, like sport modes, instead of actual date, alarm and battery status when pressing center button.
- **Current and new watch faces** following **Sport modes** fashion would be chosen among others on the app and customised by different number of fields and pages .
- **Keep all info** visible or just **Basic** (time, date...) switching after 10sec. of button press.

- Example of following menu display after choosing preferred face design with color:

Date ON/OFF
Sunset-Sunrise ON/OFF
Altitude ON/OFF
Steps ON/OFF
Calories ON/OFF
Sleep ON/OFF
Recovery ON/OFF
Last 7 days ON/OFF
Battery % ON/OFF
Moon ON/OFF
Sea Tide ON/OFF
...
Keep all info ON/OFF*

- **New possible features** on watch modes including the current ones:

- Sea tide (with chart of high/low levels and timing)
- Zoom option for visually impaired (Level 1, 2, 3) The bigger the less info.
- Temperature
- HR avg
- Air pressure (digits plus trend arrow, somehow like Core?)
- Depth gauge (snorkel function)
- Mapping on breadcrubs?
- Recovery time
- Faster access to the compass
- Full light theme on all screens (not only just in compass and exercise mode)
- Compass in exercise mode (even if there is no navigation currently)
- This beautiful SUUNTO plus weather screen (or a new screen on weather forecast) available in watch and exercise modes.
- Possibility to organize main menu (for example move up altimeter)
- Better display when pressing on center button
- Others...

- **More than one alarm** (for example going to bed, medicine...)

- **Visible countdown on watch mode** different to second alarm (meeting, medicine...)

2. On **Sport Modes option** of including all or most of this new features with digital and chart info, like depth, air pressure, sea tide, temperature.
